

INVESTIGATING THE TOPOGRAPHY OF ROME: NEW APPROACHES AND METHODS

Workshop and Discussion

New Approaches and Methods in the Topography of Rome

7th of July 2026

10:00-12:00

Room 0.2001

Fabeckstr. 23/25

14195 Berlin

Freie Universität Berlin

The workshop will focus on the challenges and potentials of reconstructing the ancient topography of the city of Rome.

Modern approaches and methods in the topographical research will be discussed.

New archaeological and topographical research in the city of Rome will be taken as examples on how to study ancient topography of crowded urban center through non-invasive methods.

The workshop is open to all

The workshop will be held in English
